SpeechAir

Smart voice recorder

Smart dictation

Sustainable and environmentally friendly innovation

We as Philips want to make the world healthier and more sustainable.

This is why we invest in the development of green technologies and products and take action to reduce our ecological footprint of our operations and supply chain. The development of new generations of Green Products and Green Technologies is driven by our Green Innovation program. Philips SpeechAir does not only open a new era in dictation, it also meets our strictly defined criteria of what we consider as green product.
